Mobile Access To Your MLS

brought to you by TRIAD MLS

cuz u're **kurious**

Welcome to **Kurio**®, the premier real estate search service that provides you with real-time access to listing information directly from your mobile phone.

No More Missed Opportunities

Whether you are on your way to meet with a client, working an open house, or even on vacation, Kurio keeps you connected with your MLS so you can easily look up the information you need and immediately respond to your clients' inquiries.

Full MLS Access

Using Kurio on your mobile device you can get a complete picture of the real estate activity in your market area, look up comparable properties, recently solds, and much more. You also have instant access to roster info, directions, showing instructions, private remarks and other 'Realtor only' MLS data you require to provide more details on the property and set up a showing for your client.

Works On Any Web-Enabled Phone

From older generation text-based phones to the newest generation of iPhones, Androids, and BlackBerrys, Kurio is optimized to work on any web-enabled mobile device. Kurio works great (and looks fantastic) on the iPad too!

Instant Access to 'My Active Listings'

Kurio provides one-click access to your active listings. So when you get a call from a prospect asking about one of your properties, you can give them the information they're looking for and email a branded property flyer without ever getting off the phone.

Search On Market & Off Market Listings

Using the Smart Search feature of Kurio you can instantly search listings by address, ML#, or agent name. You can also search by a variety of other criteria including beds, baths, square footage, acres, price, status, and date range.

View Nearby Homes

Ever been showing a home, but your client wants to know what else is available in the neighborhood? Kurio is specially designed for occasions like this! Using location based search technology, Kurio can show you similar nearby listings within a search radius that you specify.

Get Instant Market Updates

With Kurio, you can get real time Market Updates, MLS wide or for your area of business, on new residential and commercial listings, price reductions, and upcoming open houses.
